

I- Read the following text then do the tasks below:

The law related to computer crime is changing very quickly. Modern criminals are using computers to help them commit crimes like identity theft and to make it easier to commit old crimes like theft or fraud. One issue that makes it hard to fight computer crime is that this type of offence is often more difficult to solve than traditional crimes because the criminals are invisible and their actions may be hard to prove. Another issue is that it is quite difficult to prosecute a computer criminal successfully because usually nothing is actually stolen or physically damaged. In recent years, computer crime has increased as the number of people using the Internet to buy things or to access their bank accounts has grown. Techno-criminals can order goods without paying, or break into the computer systems of businesses and send viruses which can seriously damage computers and the information they contain. These viruses can affect millions of people worldwide. Criminals can use the Internet to plan crimes and pass on confidential information more easily than meetings or telephone conversations. Computers allow criminals access to millions of people whom they may persuade to pay for something worthless.

Answer the following questions: (18 marks)

1. How did criminals use to plan crimes before the invention of the Internet?
2. Why is it hard to solve a computer crime?
3. What may computer criminals convince people to do?

Find words in the text which mean the following:

(18 marks)

4. secret / private
5. the crime of lying or cheating to get money
6. to show that something is true

Rewrite these sentences about the text to correct the information: (12 marks)

7. It is easy to take techno-criminals to court because of the physical damage they leave after they have committed their crime.
8. When techno-criminals order goods, they pay after they receive the goods.

II- Read the following text then do the tasks below:

Common metals such as iron and aluminium can be melted down and reused. Recycling metal saves money and causes less pollution than processing new metal. Recycling metals also helps to **conserve** these non-renewable resources.

Recycling glass is easy and inexpensive. Glass pieces can be **melted** down over and over again to make new glass containers. The recycled pieces melt at a lower temperature than **raw** materials. Therefore less energy is required. Recycling glass also reduces the environmental damage caused by mining the raw materials that are used to make glass.

Paper mills turn wood into a thick liquid called pulp. Pulp is spread out and dried to produce paper. Pulp can also be made from used paper, such as old newspapers. Most paper products can only be recycled a few times. Recycled paper is not as **smooth** or as strong as paper made from wood pulp. Each time paper is recycled, the new paper is rougher, weaker and darker.

Choose the correct answer a, b or c: (12 marks)

9. To produce high-quality paper we use pulp made from
a- used paper b- wood c- recycled materials
10. Processing new metal than recycling it.
a- causes more pollution
b- needs a lower temperature
c- costs less money

Match two of the underlined words from the text to the definitions below: (21 marks)

11. opposite of rough
12. natural; not changed by humans
13. became a liquid by heating

Complete the following sentences with information from the text: (12 marks)

14. Recycling glass requires
15. After recycling paper many times, it becomes

III- Complete the following paragraph by filling in the gaps: (21 marks)

16. In 1975, my family left England an aeroplane. Five hours later, we arrived in Damascus, Syria.
